Uw kenmerk

Dear Mr. Parelius,

Since April 2014 we have been using Xeentec's XOO. After 7 months we can draw the following conclusions:

- **XOO has resulted in fuel savings of at least 6%**
- **XOO is very easy to use, does not require extra down-time and does not require any adaptations to the engines.**

Initially we were skeptical because many companies offer oil additives with big promises. However, after reviewing the results our skepticism disappeared. In view of the amount of diesel that our company consumes annually, Xeentec's XOO yields a very large cost reduction.

We applied Xeentec's XOO in four Euro IV trucks that, combined, travelled 195,000 Km under normal operating conditions. During that period we carefully monitored the distances and evaluated the diesel consumption. Therefore, we have a high degree of confidence in the achieved benefits.

In addition to the fuel savings, Xeentec's XOO reduces the mechanical wear of the engine components. With heavy loads that is an additional benefit.

We were positively surprised by Xeentec's products. Furthermore, it is a pleasure to work with Xeentec's team. We now intend to expand the use of Xeentec's XOO to all our trucks.

Beste Regards,
Middelkoop Beverwijk BV
